Areas of Work

Industro has 50+ years' experience in providing companies with a wide array of specialty works. Listed below are just some of the services we offer to our clients.

Chemicals and Plastics

Industro provides chemicals and plastics through several operations including production of olefins, polyolefins, aromatics, styrenics, and specialty products

Steel and Oil Refining

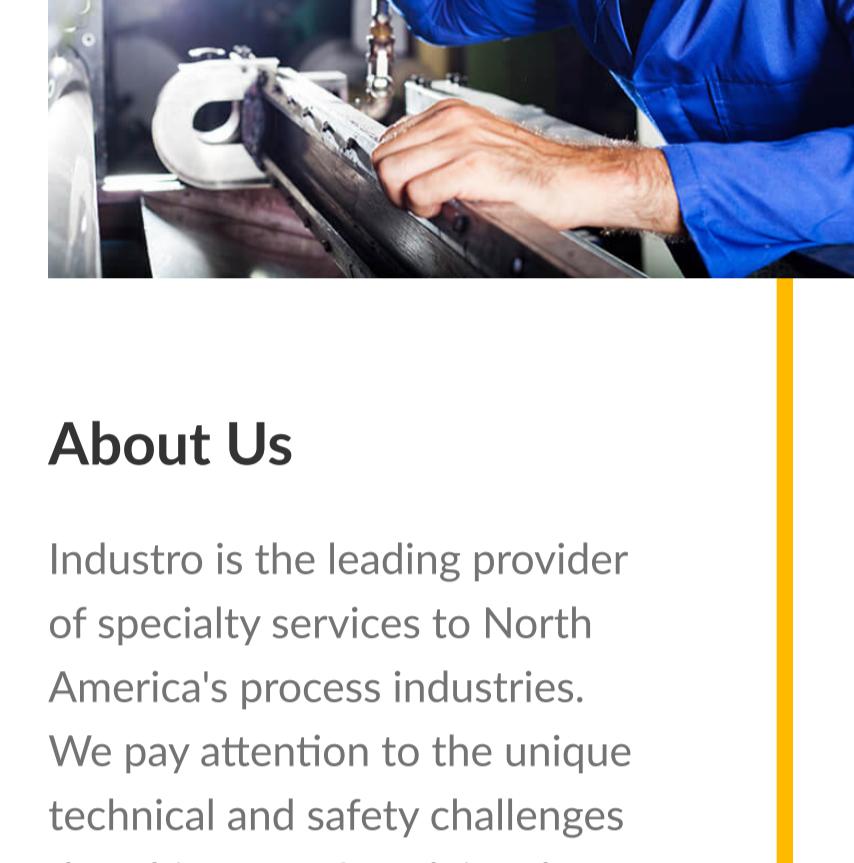

Oil and steel refinery are the most important spheres of our company operation. They play a crucial role in development of modern technologies and industries.

Mining

Modern mining processes, supported by our company, involve prospecting for ore bodies, analysis of the profit potential of a mine, and other activities.

Industrial Machinery

As a vast sphere of Industro's activity, industrial machinery covers different subareas of our work including heavy equipment and hardware production.

About Us

Industro is the leading provider of specialty services to North America's process industries. We pay attention to the unique technical and safety challenges that this type of work involves.
